

# Talented web developer sought for software engineering consultancy.

We're looking for talented **web developers to help us grow our world-class web applications firm** here in Honolulu. We would like to meet software engineers who can help us create elegant, effective, and eminently usable websites. We've got a few **web and iPhone applications of our own that are poised to become overnight successes**. Want to put that on your résumé? Drop us a line.

You should be at least familiar with **Ruby, Rails, MySQL, and modern web technologies** — standards-compliant XHTML, CSS, and Javascript/AJAX. Experience with PHP, version control, and testing frameworks is a plus but not required. You will be working closely with our small team of developers to provide clients with solutions to their problems. And **we'll pay you good money**, too.

We are happy to patiently train the right candidate, so if you think you can learn quick and perform admirably under deadlines, **even if you don't have much bona fide experience**, give us a shot and send us your résumé. We are very open to anyone who has a minimum of experience but a maximum of talent, so please show us what you've got even if you don't have any credentials.

## **About Sakuzaku**

Sakuzaku is a software engineering and usability consultancy with a focus on building fast, sleek, and eminently usable Ruby on Rails and Web 2.0 applications and services, for clients in Honolulu, Tokyo, and around the world. Founded last year, we specialize in design of web applications with a focus on improving user-experience to transparently promote client goals. We make usable websites and make websites usable.

**If you think all this is you, please send a résumé and portfolio of your work to [jobs@wearesakuzaku.com](mailto:jobs@wearesakuzaku.com). Thanks!**
